

## How iReuse Helps achieve LEED Certification

If your company is pursuing or has achieved LEED certification, iReuse can help! Our services are perfect for getting you needed credits – here's how:

### **Existing Buildings**

#### **Materials & Resources, Credits 2.1 – 2.5**

Your company receives one point for every 10% of total purchases that contain a majority (70%) of on-site reused materials (up to 5 points).

- ✓ iReuse provides a simple web based system for internal reuse that automatically matches needs in one department with surplus in another. Maximizing internal reuse not only saves money but is often the most environmentally friendly method of materials disposition.

#### **Materials & Resources, Credits 5.1 – 5.3**

Your company can get up to 3 points for diverting materials from the waste stream.

- ✓ iReuse helps clients divert materials by selling or donating them to local businesses and nonprofits. To date, iReuse has helped divert 1,887,229 pounds of materials from our clients' waste streams.

**iReuse provides you with full reporting on all materials removed from your facility and their final destinations, including tons of material reused, recycled, and disposed of, as well as estimated Greenhouse Gas reductions due to your reuse efforts.**

#### **Innovation in Design, Credit 1**

- ✓ Working with iReuse may qualify your company for 1-4 additional credits in this category.

### **New Construction, Commercial Interiors, or Core & Shell**

#### **Materials & Resources, Credits 2.1 – 2.2**

Get up to 2 points for reusing construction waste such as lumber, doors, and tile.

- ✓ iReuse's reuse network includes hundreds of nonprofit organizations and buyers who want construction materials. iReuse instantly matches your construction materials inventory with this database and automatically notifies potential recipients to streamline the matching process. We will work around your schedule to facilitate the most reuse possible.

#### **Materials & Resources, Credit 3**

Get 1-3 points for utilizing reused building materials and furniture

- ✓ iReuse automates the process of finding reused materials and furniture for your new facility. Simply create a free wish list on the iReuse system, and you'll be alerted whenever iReuse has your items available for purchase.

#### **Innovation in Design, Credit 1**

- ✓ Working with iReuse may qualify your company for 1-4 additional credits in this category
